

VIJAYARAGHAVAN K

Senior Frontend Software Engineer | React.js | Next.js | TypeScript | Redux Toolkit

Chennai, Tamil Nadu, India | +91 7904480174 | vijayaraghavan130699@gmail.com | linkedin.com/in/vijayaraghavan-k-b58391218 | vijayaraghavankportfolioresume.vercel.app

PROFESSIONAL SUMMARY

Senior Frontend Software Engineer with 4+ years of experience architecting, scaling, and securing enterprise and consumer-facing web products using React.js, Next.js (App Router), TypeScript, and Redux Toolkit. Specializes in performance engineering (Core Web Vitals, code splitting, lazy loading, Webpack/Vite bundle optimization), Zero Trust frontend security architecture, WCAG-aligned accessible UI, and real-time data visualization for AI-driven platforms - backed by a comprehensive testing and quality toolchain (Jest, React Testing Library, ESLint, Prettier, Husky) and AI-assisted development workflows (GitHub Copilot, Cursor, Claude). Leads cross-functional Agile teams, owns features end-to-end, enforces engineering standards, and mentors junior engineers toward independent, production-ready contributions.

CORE COMPETENCIES

React.js & Next.js | TypeScript Development | Performance Engineering | Zero Trust Security | Core Web Vitals | Redux Toolkit | Agile/Scrum Delivery | Cross-Functional Leadership | Code Review Standards | REST & GraphQL APIs | Component-Driven UI | Team Mentorship | Accessibility (WCAG) | AI-Assisted Development

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js (App Router & Pages Router), HTML5, CSS3, Sass/SCSS

State Management & APIs: Redux Toolkit, React Context API, REST APIs, GraphQL, Axios

UI & Styling: Tailwind CSS, Material UI (MUI), Styled Components, Responsive Web Design, Component-Driven Development

Accessibility: WCAG 2.1 AA Guidelines, ARIA Roles, Semantic HTML, Keyboard Navigation, Screen Reader Testing

Performance Engineering: Code Splitting, Lazy Loading, Tree Shaking, Bundle Optimization, Lighthouse Auditing, Core Web Vitals (FCP, LCP, TTI, CLS)

Security Architecture: Zero Trust Frontend Architecture, Secure API Proxy Routes, Automated Token Refresh, Cookie-Based Authentication

Testing & Quality: Jest, React Testing Library, ESLint, Prettier, Husky

AI-Assisted Development: GitHub Copilot, Cursor, Claude - used to accelerate feature development and streamline code review

Tools & DevOps: Git, GitHub, CI/CD Pipelines, Webpack, Vite, Babel, npm, Yarn, pnpm, Jira, Confluence

PROFESSIONAL EXPERIENCE

doodleblue Innovations - Chennai, India

Senior Frontend Software Engineer

March 2022 - Present

- **Architected** a Zero Trust frontend security model using Next.js API proxy routes, cookie-based authentication, and automated token-refresh workflows, eliminating client-side exposure of authentication tokens across two production applications.
- **Owned** end-to-end frontend delivery for high-traffic enterprise products - React.js, Next.js, TypeScript, Redux Toolkit, and REST/GraphQL APIs - shipping features to 100-200+ monthly active users in every Agile/Scrum sprint.
- **Improved** Core Web Vitals (FCP, TTI) by reducing the initial bundle size by 25-30% through dynamic code-splitting, lazy loading, and Webpack/Vite bundle optimization.
- **Built** responsive, real-time analytics dashboards for AI-driven creator platforms with Tailwind CSS and Material UI, rendering large, complex datasets without dropping frames.
- **Partnered** cross-functionally with UX, backend, QA, and product stakeholders each sprint, translating requirements into scalable, production-ready TypeScript code reviewed under strict linting standards.
- **Raised** team code quality by introducing ESLint, Prettier, and Husky pre-commit hooks, along with Jest and React Testing Library coverage in the CI/CD pipeline, cutting production bugs by 70-80%.
- **Leveraged** GitHub Copilot, Cursor, and Claude to accelerate feature development and streamline code reviews while maintaining engineering quality standards.
- **Mentored** 10 junior engineers through 40+ hours of structured frontend training, accelerating their progression toward independent, production-ready contributions.

AWARDS & RECOGNITION

Rockstar of the Month - doodleblue Innovations (July 2025)

Recognized by management for demonstrating technical expertise and leadership, efficiently handling multiple clients, and delivering effective results for the company.

KEY PROJECTS

Yatra Prime | *React.js, Redux Toolkit, Axios, Sass*

Premium travel subscription platform handling complex user onboarding and subscription states.

- **Built** a scalable dashboard layout using modular, reusable UI components, accelerating new-feature development and improving long-term maintainability.
- **Designed** robust Redux Toolkit slices to manage deeply nested subscription data and optimized checkout flows, increasing conversion by 25-30%.
- **Implemented** accessible UI patterns aligned with WCAG 2.1 AA guidelines, including semantic HTML, ARIA roles, and full keyboard navigation across the booking and checkout flows.

Animeta AI | *Next.js (App Router), TypeScript, Tailwind CSS, REST APIs*

AI-backed web ecosystem providing digital content creators with growth metrics and monetization insights.

- **Engineered** high-performance, real-time charts and metric-tracking modules in TypeScript, rendering large volumes of data for dynamic dashboards without dropped frames.
- **Leveraged** Next.js App Router capabilities to streamline the architecture and improve server-side rendering performance.

Comviva Telesat & Comviva Mobilytix | *React.js, REST APIs, JavaScript*

Enterprise marketing automation interfaces and automated performance-reporting engines.

- **Integrated** complex marketing automation REST APIs with frontend interfaces, streamlining data-fetching and error-handling patterns.
- **Optimized** enterprise client interfaces, improving overall page-load speed and data-table responsiveness for large datasets.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Agurchand Manmull Jain College - Chennai, India | 2019

Core Focus: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS)
