

VIJAYARAGHAVAN K

Senior Frontend Software Engineer | React.js · Next.js · TypeScript · Redux Toolkit

Chennai, Tamil Nadu, India | +91 7904480174 | vijayaraghavan130699@email.com | linkedin.com/in/vijayaraghavan-k-b58391218

PROFESSIONAL SUMMARY

Senior Frontend Software Engineer with 4+ years of experience architecting, scaling, and securing enterprise and consumer-facing web products with React.js, Next.js (App Router), TypeScript, and Redux Toolkit. Specialised in performance engineering (Core Web Vitals, code splitting, lazy loading), Zero-Trust frontend security architecture, and real-time data visualisation for AI-driven platforms. Proven track record leading cross-functional Agile teams, owning features end-to-end, enforcing engineering standards, and mentoring engineers — looking to bring a product-first, ownership-driven mindset to a fast-scaling product company.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js (App Router & Pages Router), HTML5, CSS3, Sass/SCSS

State Management & APIs: Redux Toolkit, React Context API, REST APIs, GraphQL, Axios

UI & Styling: Tailwind CSS, Material UI (MUI), Styled Components, Responsive Web Design, Component-Driven Development

Performance Engineering: Code Splitting, Lazy Loading, Tree Shaking, Bundle Optimisation, Lighthouse Auditing, Core Web Vitals (FCP, LCP, TTI, CLS)

Security Architecture: Zero-Trust Frontend Architecture, Secure API Proxy Routes, Automated Token Refresh, Cookie-based Authentication

Testing & Quality: Jest, React Testing Library, ESLint, Prettier, Husky

Tools & DevOps: Git, GitHub, CI/CD Pipelines, Webpack, Vite, Babel, npm, yarn, pnpm, Jira, Confluence

PROFESSIONAL EXPERIENCE

doodleblue Innovations — Chennai, India

Senior Frontend Software Engineer

March 2022 – Present

- Architected a Zero-Trust frontend security model using Next.js API proxy routes and automated token-refresh workflows, eliminating client-side exposure of auth tokens across **2 production applications**.
- Owned end-to-end frontend delivery for high-traffic enterprise products (React.js, Next.js, TypeScript, Redux Toolkit) serving **100–200+ monthly active users** within Agile/Scrum sprints.
- Improved Core Web Vitals through dynamic code-splitting and lazy loading, meaningfully reducing initial bundle size and improving First Contentful Paint (FCP) and Time to Interactive (TTI).
- Built responsive, real-time analytics dashboards for AI-driven creator platforms, rendering large, complex datasets seamlessly without dropping frames.
- Partnered cross-functionally with UX, backend, QA, and product stakeholders each sprint cycle, translating requirements into scalable, production-ready code.
- Raised team code quality by introducing ESLint, Prettier, and Husky into the CI pipeline and enforcing structured code reviews, cutting production bugs by **70–80%**.
- Mentored **10 junior engineers** through 40+ hours of structured frontend training, accelerating their ramp-up to independent, production-ready contributions.

AWARDS & RECOGNITION

Rockstar of the Month — doodleblue Innovations (July 2025)

Recognised by management for technical expertise, leadership, efficiently handling multiple clients, and delivering effective results for the company.

KEY PROJECTS

Yatra Prime | React.js, Redux Toolkit, Axios, Sass

Premium travel subscription platform handling complex user onboarding and subscription states.

- Built a scalable dashboard layout using modular, reusable UI components, accelerating new-feature development and improving long-term maintainability.
- Designed robust Redux Toolkit slices to manage deeply nested subscription data and optimised checkout flows to eliminate performance friction and improve conversion.

Animeta AI | *Next.js (App Router), TypeScript, Tailwind CSS, REST APIs*

AI-backed web ecosystem providing digital content creators with growth metrics and monetisation insights.

- Engineered high-performance real-time charts and metric-tracking modules, rendering large volumes of data for dynamic dashboards without dropped frames.
- Leveraged Next.js App Router capabilities to streamline architecture and speed up server-side rendering.

Comviva Telesat & Comviva Mobilytix | *React.js, REST APIs, JavaScript*

Enterprise marketing-automation interfaces and automated performance-reporting engines.

- Integrated complex marketing-automation REST APIs with frontend interfaces, streamlining data-fetching and error-handling patterns.
- Optimised enterprise-client interfaces, improving overall page load speed and data-table responsiveness for large datasets.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Agurchand Manmull Jain College — Chennai, India

Core Focus: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS)
