PROFESSIONAL SUMMARY

Senior Frontend Developer with 4+ years of experience building secure, fast, and scalable web applications for enterprise clients and high-traffic consumer platforms. Works primarily with React.js, Next.js (App Router), TypeScript, and Redux Toolkit. Has delivered digital retail experiences for global brands such as H&M and Bath & Body Works through Adobe client engagements, as well as enterprise platforms for Comviva and Yatra. Core strengths include frontend performance and Core Web Vitals, secure cookie-based authentication, WCAG 2.1 AA accessibility, and headless e-commerce architecture, with hands-on full-stack experience in Node.js, Express, and MongoDB through personal projects. Leads Agile/Scrum delivery, enforces code quality through automated testing in CI/CD pipelines (Jest, React Testing Library), and mentors junior engineers.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass/SCSS
- **Frameworks and Libraries:** React.js (including React 19), Next.js (App Router and Pages Router, including Next.js 16), Redux Toolkit, React Context API, Axios, GraphQL, REST APIs, Server-Side Rendering (SSR), React Server Components, Static Site Generation (SSG), React Compiler
- **UI and Component Systems:** Tailwind CSS, Material UI (MUI), Styled Components, Responsive Web Design, Component-Driven Development, Design Systems, Drag and Drop (@dnd-kit), Optimistic UI
- **Performance:** Core Web Vitals (LCP, FCP, CLS, INP), Code Splitting, Lazy Loading, Tree Shaking, Webpack, Vite, Lighthouse, Virtualised Lists, Image Optimisation
- **Security and Architecture:** Zero-Trust Frontend Architecture, Next.js API Proxy Routes, HTTP-Only Cookie Authentication, Token Refresh Flows, Headless E-Commerce, Frontend System Design, Error Boundaries
- **Adobe and Enterprise Platforms:** Adobe Experience Cloud, Adobe Commerce (Magento, headless), Adobe Analytics, Adobe Target
- **Testing and Code Quality:** Unit and Integration Testing, Jest, React Testing Library, ESLint, Prettier, Husky, SonarQube
- **DevOps and Tools:** Git, GitHub, CI/CD Pipelines, Babel, npm, Yarn, pnpm, Jira, Confluence, Agile/Scrum, Code Reviews
- **Backend (Full-Stack Projects):** Node.js, Express.js, MongoDB, Mongoose, JWT Authentication, Role-Based Access Control (RBAC), Swagger/OpenAPI
- **Accessibility:** WCAG 2.1 AA, ARIA Roles and Landmarks, Semantic HTML, Screen Reader Testing, Keyboard Navigation
- **AI-Assisted Development:** GitHub Copilot, Cursor, Claude AI

PROFESSIONAL EXPERIENCE

Senior Frontend Software Engineer

doodleblue Innovations | Chennai, India | March 2022 – Present

- Designed a Zero-Trust frontend security layer using Next.js API proxy routes, HTTP-only cookies, and automatic token refresh, removing client-side token exposure across 2 production applications.
- Led end-to-end frontend development with React.js, Next.js, TypeScript, and Redux Toolkit, shipping features for platforms serving 100K+ monthly active users in bi-weekly Agile/Scrum sprints.
- Cut initial JavaScript bundle size by over 25% through dynamic code splitting, lazy-loaded components, and tree shaking with Vite and Webpack, achieving sub-second First Contentful Paint (FCP) and a faster Time to Interactive (TTI).

- Led frontend delivery for enterprise accounts including H&M and Bath & Body Works (via Adobe) and telecom leader Comviva, owning architecture, code quality, and on-time releases from sprint planning to production.
- Added Jest, React Testing Library, ESLint, Prettier, and Husky pre-commit hooks to CI/CD pipelines, raising test coverage and cutting production bug leakage by over 40%.
- Built real-time analytics and reporting dashboards with Tailwind CSS and Material UI that render large data tables and high-frequency event feeds smoothly, without dropped frames.
- Accelerated coding, component scaffolding, and pull request reviews by adopting AI coding assistants (GitHub Copilot, Cursor, Claude AI) in daily development, while upholding architecture and code quality standards.
- Mentored 10 junior frontend engineers through 40+ hours of structured training on React best practices, state management, and TypeScript, helping them reach production-ready commits faster.

KEY PROJECTS

Client projects delivered at doodleblue Innovations (March 2022 – Present)

H&M – Global Fashion E-Commerce

Adobe client engagement | React.js, TypeScript, Next.js, Tailwind CSS, REST and GraphQL APIs, Adobe Experience Cloud

- Built fast, modular Product Listing Pages (PLP) and Product Detail Pages (PDP) with multi-region locale support, faceted filtering, and infinite scroll.
- Optimised the critical rendering path and image delivery, raising the mobile Lighthouse performance score from 64 to 92 and reducing Time to Interactive (TTI) by 35%.
- Worked with UX designers and Adobe specialists to integrate headless commerce APIs and Adobe Analytics event tracking for real-time shopper journey insights.

Bath & Body Works – Retail E-Commerce and Promotions

Adobe client engagement | React.js, Redux Toolkit, Sass/SCSS, Axios, Adobe Target

- Developed seasonal campaign landing pages and interactive product bundle builders designed to stay stable during flash-sale traffic spikes.
- Integrated Adobe Target for A/B testing and personalised content, increasing promotional click-through rate (CTR) by 18%.
- Standardised design system components to meet WCAG 2.1 AA standards, delivering full keyboard accessibility and screen reader support across the checkout flow.

Yatra Prime – Travel Subscription Platform

React.js, Redux Toolkit, Axios, Sass, REST APIs

- Created a modular dashboard built from reusable UI components, improving feature delivery speed by 20%.
- Designed normalised Redux Toolkit slices to manage multi-tier subscription states and checkout flows, contributing to an increase of over 25% in subscription conversions.
- Implemented WCAG 2.1 AA-compliant UI patterns with full keyboard navigation across payment and onboarding flows.

Animeta AI – Creator Growth and Monetisation Platform

Next.js (App Router), TypeScript, Tailwind CSS, REST APIs

- Built real-time analytics dashboards and dynamic charts in TypeScript that render complex creator metrics smoothly at 60 FPS.
- Used Next.js Server and Client Components to optimise server-side rendering (SSR), reducing initial data loading time by 40%.

Telesat Lightspeed – Enterprise Satellite Network Management Portal

React.js, JavaScript (ES6+), REST APIs, CSS3, Material UI

- Optimised enterprise client interfaces for high-throughput network monitoring, delivering faster load times and smoother, more responsive data tables.

- Developed secure, modular client portal dashboards with role-based access control (RBAC) for international enterprise telecommunications management.
- Refactored legacy code into modular React functional components, reducing technical debt and making the codebase easier for distributed teams to maintain.

Comviva Mobilytix – AI Marketing Automation Platform

React.js, Redux, REST APIs, Virtualised Tables, Highcharts

- Developed marketing automation screens with virtualised data tables and real-time campaign reports that handle 50,000+ records without lag.
- Streamlined API handling and added error boundaries and retry logic, preventing UI freezes during heavy background data syncs.
- Built campaign configuration workflows and real-time analytics that help enterprise marketing teams monitor audience engagement.

PERSONAL PROJECTS

TaskFlow – Full-Stack Collaborative Task Management Platform

Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS, Redux Toolkit, @dnd-kit, Node.js, Express 5, MongoDB, Swagger | Live: taskflow-fe-beryl.vercel.app | Code: github.com/VR1306/taskFlow-FE

- Built a task management platform with an interactive Kanban board, drag-and-drop workflows using @dnd-kit, optimistic UI updates, and multi-criteria filtering.
- Implemented secure JWT authentication with custom role-based access control (RBAC) and protected route guards across the Next.js App Router, with centralised state management in Redux Toolkit.
- Developed an Express 5 and MongoDB (Mongoose) backend with interactive OpenAPI/Swagger documentation and automated tests that meet SonarQube quality gate standards.

AidPro – CPR and First-Aid Training Web App

Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS v4, React Compiler | Live: aid-pro-108.vercel.app | Code: github.com/VR1306/aid-pro

- Built a CPR and first-aid training app with step-by-step emergency guides covering CPR do's and don'ts, the Heimlich manoeuvre, the AVPU responsiveness scale, and the log-roll technique.
- Structured each procedure as a modular section with reusable components, statically prerendered (SSG) on the Next.js App Router for instant loads on any device.

HONOURS AND AWARDS

Rockstar of the Month – doodleblue Innovations | July 2025

Recognised by executive leadership for technical ownership, reliable delivery across multiple high-priority client accounts, and production excellence.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Agurchand Manmull Jain College | Chennai, India | 2019

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Web Technologies
